IT Instructor & Developer

Peshawar, Pakistan | sohrabalefi99@gmail.com | [linkedin.com/in/sohrabalefi](https://www.linkedin.com/in/sohrabalefi) | github.com/sohrabansari990 | sohrabalefi.me

SUMMARY

Final-year Software Engineering student with 2.5+ years of IT teaching experience and active freelance work in full-stack development and AI automation. Co-founded and shipped a live e-commerce product. Accepted Data Analyst Intern at Bold Analytics. Experienced in teaching DIT/CIT and MERN stack courses both in-person and online.

EDUCATION

BS Software Engineering (Final Year)

Abasyn University, Peshawar | Expected Graduation: Jan 2027

EXPERIENCE

Data Analyst Intern

Bold Analytics | 2026 | Remote

- Analyzing data to generate business insights and support data-driven decision-making
- Working with data querying, reporting, and visualization as part of a remote analytics team

IT Instructor

Stanford English Language and Computer Institute, Peshawar | 2.5+ Years

- Taught Networking, Python Programming, Microsoft Office 365, and Video Editing
- Delivered DIT/CIT curriculum to classroom and online students

Co-Founder

Saqib Watches | 2024 to Present

- Built an e-commerce platform that allowed a watch brand to take orders online, manage a product catalog, and notify the owner of new orders automatically, replacing a fully manual process

AI Automation Freelancer

Remote | Ongoing

- Built automation systems and workflows for clients using AI APIs and custom integrations

MERN Stack Instructor

Online | Ongoing

- Teaching full-stack web development (MongoDB, Express, React, Node.js) to online students

SKILLS

Languages and Frameworks: JavaScript, Python, HTML/CSS/SCSS, React, Next.js, Node.js, Redux, Tailwind CSS

Databases: MongoDB, PostgreSQL, SQL, Supabase

Cloud and Tools: Microsoft Azure, Vercel, Git/GitHub, REST APIs

Soft Skills: Team Management, Communication, Problem Solving, Curriculum Development

CERTIFICATIONS

- Full-Stack Engineering with JavaScript | CodeSignal | June 2025
- Journey into SQL | CodeSignal | June 2025
- Azure Fundamentals | Microsoft / Simplilearn | August 2025

PROJECTS

Saqib Watches | saqib.watch

Built a complete e-commerce solution that allowed a local watch brand to establish an online presence, display products, and handle customer orders, solving the problem of having no digital sales channel.

LMS (Learning Management System) | github.com/sohrabansari990/LMS

Solved the problem of instructors and students having no centralized place to manage courses and materials. Built a role-based platform where admins approve instructors, instructors upload course content, and students access everything in one place, replacing scattered manual coordination.

AI Chat Interface (Gemini Clone) | gemini-clone-2025.netlify.app

Solved the problem of having no hands-on reference for building a modern AI chat UI. Created a fully working, mobile-responsive chat interface with real AI API integration that demonstrates how production AI products handle conversations, code formatting, and responsive design.
